

## Key Investor Information Document for investors

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### UI I - ValuFocus - share class ECU, a sub-fund of UI I

WKN / ISIN: A2PU33 / LU2079399270

This fund is managed by Universal-Investment-Luxembourg S.A. ("the management company").

#### Objectives and investment policy

The sub-fund is actively managed.

The objective of the sub-fund is to seek to outperform the MSCI World Net Total Return USD (Bloomberg ticker M1WO) by investment in a diversified portfolio of stocks selected through a specific fundamental research methodology in the global equity markets excluding emerging markets.

The sub-fund will aim to meet the investment objective - while respecting the principle of risk diversification - by investing primarily in equity securities denominated in EUR, CHF, GBP, USD or JPY or in other freely convertible currencies of companies listed on worldwide exchanges excluding emerging markets (long only, no shorts, no derivatives). The sub-fund will seek exposure to a portfolio of typically 35 to 50 global equities excluding emerging markets, with the potential to go outside this range depending on market conditions. These stocks will be selected using the ValuAnalysis "Modern Intrinsic Value" methodology ("MIV"), which applies fundamental intrinsic value research to stock picking; in addition, each portfolio stock is subject to a systematic Environmental Social and Governance ("ESG") screening.

The benchmark for the sub-fund is: 100% MSCI World NDR (USD). This benchmark is determined for the sub-fund by the investment management company and may be changed. The sub-fund does not aim to reproduce the benchmark. The portfolio manager may invest at their own discretion in securities or industries not included in the benchmark in order to capitalise on specific investment opportunities. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the benchmark. This deviation may be material.

The sub-fund may perform derivative trades in order to hedge positions or to increase its returns.

Within this scope, the choice of the individual assets is performed by the investment manager of the sub-fund.

Income shall remain in the sub-fund (or: in this unit class) and shall increase the value of the shares.

Investors may, in general, redeem their shares with the management company on each trading day, i.e. each entire bank working day in Luxembourg and in Frankfurt am Main. The fund may, however, suspend redemptions when extraordinary circumstances exist which, taking into consideration the interests of the shareholders, make a suspension appear necessary.

**The sub-fund is suitable for investors who are able to assess the risks and the value of the investment. The investor must be prepared and able to deal with significant value fluctuations to the units and if necessary a considerable capital loss. This sub-fund is potentially not suitable for investors who want to withdraw their money from the sub-fund again within a period of less than 7 years, and who are prepared to accept the risk of significant temporary losses and to afford to set aside the capital over a long timeframe. The sub-fund is designed to meet the investment objective of building up capital and it is suitable for investors who have experience with volatile products and wish to attain defined investment objectives. Investors should consider their own personal circumstances and seek additional advice from their financial adviser or other professional adviser on their risk tolerance and investment horizon before investing in the sub-fund.**

#### Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 6 because its share value fluctuates strongly and therefore the chance of profit but also the risk of loss can be high.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section "Risks of Investment" in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- Credit risks: The sub-fund may invest a part of its assets in debt securities issued by governments or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- Risks from the use of derivatives: The sub-fund may use derivatives for the purposes described above under "Objectives and Investment Policy". This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- Custody risks: The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breach duties of due care or engages in abusive conduct.
- Operational risks: The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.

**Charges**

One-off charges payable by the investors:

**Entry charge / Exit charge: 3.00% / 1.00%**

The entry / exit charge listed here is a maximum figure. In individual cases it may be lower. You may inquire about the figure applicable to you with the distributor of the units.

Charges taken from the Fund over the year:

**Ongoing charge: 1.17%**

Charges taken from the Fund under certain specific conditions:

**Performance fee: none**

The ongoing management and custody of the sub-fund's assets as well as the distribution of the shares are financed through the fees and other costs. Arising costs decrease the chances of return for the investor.

Where different share classes are offered within the sub-fund, an exchange of shares from one share class for shares in another share class within the sub-fund is possible, so long as the investor fulfils the conditions of the respective share class. In this case no exchange commission is charged.

The ongoing charge mentioned here was incurred in the preceding financial year of the sub-fund (or this share class) which ended on December 2020. The effective charge may vary from year to year. The ongoing charges figure does not include Performance fees and charges for the purchase and sale of assets (Portfolio transaction costs). The annual report for each financial year includes details of the exactly calculated costs. Further information about costs can be found in the detailed description of the sub-fund in the Appendix of the prospectus.

**Past performance**

This share class has not been existing long enough for details to be given about the performance in full calendar years.

**Past performance is not a guarantee for the future.**

**The sub-fund was set up on 29.01.2020, this share class was launched at 29.01.2020.**
